EXECUTIVE SUMMARY

I'm Rishabh, a passionate second-year Computer Science student with a deep love for coding and developing web-based solutions. I am constantly excited about exploring new technologies and leveraging them to create innovative and impactful projects. In the past I've also done some freelancing projects

PROJECTS

WeatherWise

A weather app that offers users the ability to analyze weather conditions and plan their day accordingly. It serves as a reliable tool to assist users in staying informed about the current weather and making informed decisions based on the forecast.

[ReactApp\(WeatherWise\)](#)

TaskMaster

A productivity-enhancing to-do app that assists users in effectively managing their tasks and increasing their daily efficiency. It serves as a valuable tool to support users throughout the day, aiding them in organizing and completing their activities.

[ReactApp\(TaskMaster\)](#)

BlockFolio

A crypto tracker app that serves as a powerful tool for users to analyze and monitor cryptocurrency trends. It assists users in staying updated with the dynamic crypto market and making informed decisions.

[ReactApp\(BlockFolio\)](#)

The High Vault Security

I developed a website for a client that fully aligns with their specific needs and preferences. By carefully understanding their requirements, I ensured that the website meets all the desired functionalities and design elements.

[TheHighVaultSecurity.com](#)

NumberNinja

A calculator that aims to provide users with a stress-free and efficient approach to mathematical calculations, making their work easier and allowing them to focus on other tasks. This calculator serves as a practical tool to simplify complex calculations and eliminate the need for manual computation.

[ReactApp\(NumberNinja\)](#)
