## Summary

Hey everyone, I'm Rishabh, a second-year CS student with a coding itch I just gotta scratch! Building web solutions and diving into new tech keeps me energized. I've already gotten my hands dirty freelancing, building websites for Hifhvault Security (Canada) and Canada Fellow (helping students navigate visa processes). To stay sharp, I've tackled over 600 challenges on LeetCode. Now, I'm pumped to collaborate and conquer whatever challenges come our way!

## Experience

**The High Vault Security** Apr 2023 - May 2023  
Web Developer

I developed a website for a client that fully aligns with their specific needs and preferences. By carefully understanding their requirements, I ensured that the website meets all the desired functionalities and design elements

**Canadian Fellow** Aug 2023 - Oct 2023  
Web Developer

I built a client a website that wasn't just functional, it was flexible! Plus, I worked closely with the client to make sure the design matched their vision exactly. It was like building a custom online experience, and they loved it!

## Projects

### WeatherWise

🔗 <https://main--storied-cucurucho-6ad514.netlify.app/>

A weather app that offers users the ability to analyze weather conditions and plan their day accordingly. It serves as a reliable tool to assist users in staying informed about the current weather and making informed decisions based on the forecast.

### BlockFolio

🔗 <https://main--exquisite-crostata-c7412b.netlify.app/>

A crypto tracker app that serves as a powerful tool for users to analyze and monitor cryptocurrency trends. It assists users in staying updated with the dynamic crypto market and making informed decisions.

### TaskMaster

🔗 <https://main--incomparable-rabanadas-1e91d1.netlify.app/>

A productivity-enhancing to-do app that assists users in effectively managing their tasks and increasing their daily efficiency. It serves as a valuable tool to support users throughout the day, aiding them in organizing and completing their activities.
