Projects	**The High Vault Security** I developed a website for a client that fully aligns with their specific needs and preferences. By carefully understanding their requirements, I ensured that the website meets all the desired functionalities and design elements. HVS (thehighvaultsecurity.com)		
	TaskMaster I have developed a productivity-enhancing to-do app that assists users in effectively managing their tasks and increasing their daily efficiency. This		

	application serves as a valuable tool to support users throughout the day, aiding them in organizing and completing their activities. React App (main--incomparable-rabanadas-1e91d1.netlify.app)
	WeatherWise I have created a weather app that offers users the ability to analyze weather conditions and plan their day accordingly. This application serves as a reliable tool to assist users in staying informed about the current weather and making informed decisions based on the forecast. React App (main--storied-cucurucho-6ad514.netlify.app)
	BlockFolio I have designed and developed a crypto tracker app that serves as a powerful tool for users to analyze and monitor cryptocurrency trends. This application assists users in staying updated with the dynamic crypto market and making informed decisions. React App (main--exquisite-crostata-c7412b.netlify.app)
	NumberNinja I have developed a calculator that aims to provide users with a stress-free and efficient approach to mathematical calculations, making their work easier and allowing them to focus on other tasks. This calculator serves as a practical tool to simplify complex calculations and eliminate the need for manual computation React App (csb-us4f7v-rishabhjain2003.vercel.app).
